

AIRPOWER LINE TEC-360™ CLAMP

The AirPower Line TEC-360™ Clamp offers all the same robust features as our original AirPower Line TEC-CLAMP™ with the added benefit of the red swivel top the TEC-360™ swivel top allows for the AirPower Line to rotate freely, preventing binding, interlocking springs, and stress on connection points.

Part No. 9890ST360
Stk. Code 47331

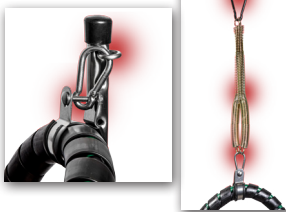

Stainless steel Speed Clip makes tender kit or pogo stick installations quick & easy

Red swivel top allows for a full 360° of rotation - no binding!

Heavy duty composite body provides superior strength and high performance in the most extreme application environments.

Body design is optimized to fit TECTRAN 3-In-One Air Power lines.

Easy to use aluminum locking clasp - No tools needed!

PROBLEM

Traditional clamps may lead to binding in your AirPower Line suspension. This limits movement and stresses suspension connection points and trailer connections. Binding may also cause tender springs to overlap and interlock so they cannot retract.

SOLUTION

The TEC-360™ red swivel top allows for the AirPower Line to rotate freely. This prevents binding, interlocked springs, and stress on connection points.
