

Job Title: Business Analyst

Tectran Manufacturing Inc is an industry leading manufacturer and marketer of air, hydraulic and electrical systems for the transportation industry. The primary market focus includes the heavy-duty tractor trailer and bus industries. Our commitment to quality and durability assure leading edge product designs and superior performance for demanding market applications. We hold several patents and make it a practice to listen closely to the needs of the end user.

Tectran, located in Western New York, offers a hybrid work schedule. This position will be required to be on-site 3 days/week.

Job Description:

Tectran is seeking a Business Analyst to become a vital member of our team. This position will serve as the principal Project manager and Developer within our Epicor environment and serve in a variety of IT support roles. An ideal candidate exudes flexibility and learns quickly in various technical and business environments, while delivering quality work within project deadlines. Candidates must be experienced in both front-end and back-end architecture and coding.

The Business Analyst works closely with Management and IT to help achieve our strategic goals. The Analysts' primary focus is the sync-ing of primary systems to improve performance and usage – optimizing business process in our ERP system (Epicor Kinetic), API integration, EDI software and customer managed integrations to our ERP and various third-party software.

We hope this key addition to the team further advances Tectran's digital transformation while bringing a fresh perspective and new ideas.

Responsibilities & Systems:

- Participate in the technical planning & requirements gathering phases including estimate, develop, test, manage projects, architect and deliver.
- Serve as a technical lead and mentor.
- Provide technical support or leadership in the development and continual improvement in a variety of departments.
- Develop and maintain effective working relationships with team members.
- Demonstrate the ability to adapt and work with team members of various experience levels.

Qualifications & Requirements:

- 5+ Years of hands-on experience working with ERP, EDI, CRM and CMS systems, including the business needs around integrating and optimizing business processes. Experience in a manufacturing and/or distribution environment ideal.
- Hands-on use of Application lifecycle management (ALM) Software, Bug Tracking Software, Integrated Development Environment (IDE) Software, Source Code/Customizations Management, MySQL, Open-Source frameworks, JSON, GIT or equivalent source control, SOAP, REST
- Strong understanding of API integration – Epicor, Sales-I, BigCommerce, & EDI applications.
- Familiar with object-oriented coding methodologies
- Degree in Computer Science or equivalent

The ideal candidate would be able to work independently and efficiently in a detail-oriented project environment that has *real* business impact. Strong problem solving, data analysis, project management, and analytical skills are needed to be a successful candidate.
